

# Example 'FIELD' Test Circuit Set-Up

Twenty-Five (25) total units connected  
across 5 Shelves.

Circuit 1 = 5 fixtures/remotes

Circuit 2 = 5 fixtures/remotes

Circuit 3 = 5 fixtures/remotes

Circuit 4 = 10 fixtures/remotes

The **FIELD** circuit is connected to a controller to facilitate communication (shown below):

The **CONTROLLER/MASTER** is connected to a **CCR** (Constant Current Regulator) to power the circuit (shown below):

The **CCR** can be set to 1 of the 5 STEPS ranging from **2.8A** to **6.6A**
